

**THANK YOU FOR YOUR PURCHASE FROM MARTHA'S VINEYARD GLASSWORKS.** We want to make sure your artwork stays in the best condition possible so it'll last a lifetime. Please carefully read the following instructions for proper care of hand blown glass. Martha's Vineyard Glassworks stands behind the quality of our artwork, and any manufacturing defect. Please note that we cannot be responsible for damage caused by improper care.

**CLEANING** Hand blown glass is a soft Soda Lime glass—improper cleaning may crack or cause surface abrasions. Always hand-wash your piece in warm, soapy water, and dry with a soft, clean towel or rag. **We do not guarantee that our glass is dishwasher safe.** Never put hand blown glass in a microwave. Extreme changes in temperature may cause glass to crack—never place hand blown glass in the refrigerator or freezer to chill. Do not pour hot liquids into any glass. If the piece you own has an unpolished or frosted exterior, it has gone through a secondary process called “sandblasting.” Do not use water or glass cleaner as it will dull the intended surface quality; instead we recommend that you clean your piece using our Cleaning Oil with a clean towel or rag.

**HANDLE WITH CARE** Always remove any jewelry that may come in contact with the glass: rings, zippers, or buttons on clothing can cause unintentional breakage, and can scratch glass surfaces. Also, it is important to hold glass with both hands, being especially careful with handled pieces.
